Plant and Soil **127**: 301–303, 1990.

Contents of Volume 127 1990

Volume 127, No. 1

S. R. Troelstra, L. A. P. Lotz, R. Wagenaar and L. Sluimer, Temporal and spatial variability in soil nutrient status of a former beach plain 1
U. E. Grauer and W. J. Horst, Effect of pH and nitrogen source on aluminium tolerance of rye (*Secale cereale* L.) and yellow lupin (*Lupinus luteus* L.) 13
C. A. Beyrouty, C. P. West and E. E. Gbur, Root development of bermudagrass and tall fescue as affected by cutting interval and growth regulators 23
J. W. M. Pijnenborg, T. A. Lie and A. J. B. Zehnder, Inhibition of nodulation of lucerne (*Medicago sativa* L.) by calcium depletion in an acid soil 31
N. Senesi, E. Loffredo and G. Padovano, Effects of humic acid-herbicide interactions on the growth of *Pisum sativum* in nutrient solution 41
D. J. Ross, P. B. S. Hart, G. P. Sparling and J. A. August, Soil restoration under pasture after topsoil removal: Some factors influencing C and N mineralization and measurements of microbial biomass 49
J. M. Verstraten, J. C. R. Dopheide, J. J. H. M. Duysings, A. Tietema and W. Bouten, The proton cycle of a deciduous forest ecosystem in the Netherlands and its implications for soil acidification 61
B. N. Johnson and W. B. McGill, Variations in ergosterol content and ornithine decarboxylase activity of ectomycorrhizal root-soil systems 71
E. Liljeroth, E. Bååth, I. Mathiasson and T. Lundborg, Root exudation and rhizoplane bacterial abundance of barley (*Hordeum vulgare* L.) in relation to nitrogen fertilization and root growth 81
T. Claussen, Dry ash, a better reference base than dry matter for heavy metals and other persistent pollutants 91
R. Dobson and I. W. Buddenhagen, Rice hull and caryopsis discoloration diseases. I. Severity and incidence in three ecosystems in West Africa 97
R. Dobson and K. Aluri, Rice hull and caryopsis discoloration diseases. II. Effects of soil and soil water on hull disease at two sites in Nigeria 103
C. van Dijk and A. Sluimer-Stolk, An ineffective strain type of *Frankia* in the soil of natural stands of *Alnus glutinosa* (L.) Gaertner 107
R. G. Menon and S. H. Chien, Phosphorus availability to maize from partially acidulated phosphate rocks and phosphate rocks compacted with triple superphosphate 123
H. Kuhlmann, Importance of the subsoil for the K nutrition of crops 129
M. H. Behboudian and D. R. Anderson, Effects of potassium deficiency on water relations and photosynthesis of the tomato plant 137
C. Martin, D. Vega, J. Bastide and P. Davet, Enhanced degradation of iprodione in soil after repeated treatments for controlling *Sclerotinia minor* 140
B. R. Buttery and A. H. Gibson, The effect of nitrate on the time course of nitrogen fixation and growth in *Pisum sativum* and *Vicia faba* 143

Volume 127, No. 2

K. F. Nieto and W. T. Frankenberger, Jr., Influence of adenine, isopentyl alcohol and *Azotobacter chroococcum* on the growth of *Raphanus sativus* 147
R. Wheatley, K. Ritz and B. Griffiths, Microbial biomass and mineral N transformations in soil planted with barley, ryegrass, pea or turnip 157
N. Sanginga, G. D. Bowen and S. K. A. Danso, Assessment of genetic variability for N_2 fixation between and within provenances of *Leucaena leucocephala* and *Acacia albida* estimated by ^{15}N labelling techniques 169
S. R. Troelstra, R. Wagenaar and W. de Boer, Nitrification in Dutch heathland soils. I. General soil characteristics and nitrification in undisturbed soil cores 179
W. de Boer, P. J. A. Klein Gunnewiek and S. R. Troelstra, Nitrification in Dutch heathland soils. II. Characteristics of nitrate production 193
G. S. Banuelos, D. W. Meek and G. J. Hoffman, The influence of selenium, salinitiy, and boron on selenium uptake in wild mustard 201
J. H. Haas and J. A. Menge, VA-mycorrhizal fungi and soil characteristics in avocado (*Persea americana* Mill.) orchard soils 207
B. Singh, Y. P. Dang and S. C. Mehta, Influence of nitrogen on the behaviour of nickel in wheat 213
J. F. Angus, M. Sudjadi, C. F. de St. Groth, N. S. Mulyani, Hadiwahyono, M. Damdam and R. Wetselaar, Simulating nitrogen response of irrigated rice 219
T. C. Ta, F. D. H. MacDowall and M. A. Faris, Utilization of carbon and nitrogen reserves of alfalfa roots in supporting N_2-fixation and shoot regrowth 231
S. O. Osunlaja, Effect of organic soil amendments on the incidence of stalk rot of maize 237
G. R. Cline and K. Kaul, Inhibitory effects of acidified soil on the soybean/Bradyrhizobium symbiosis 243
B. Prasad and S. M. Umar, Effect of rice based six multiple cropping sequences under two cycles of crop rotations on yield and fertility status of soil 251
M. E. Avery and D. Rhodes, Growth characteristics and total N content of a Leucaena/Sorghum agroforestry system 259
G. W. McCarty, J. M. Bremner and J. S. Lee, Inhibition of plant and microbial ureases by phosphoroamides 269
L. Skøt, S. P. Harrison, A. Nath, L. R. Mytton and B. C. Clifford, Expression of insecticidal activity in Rhizobium containing the δ-endotoxin gene cloned from *Bacillus thuringiensis* subsp. *tenebrionis* 285
